

Workshops

We have just begun to schedule our 2019 guest workshops

If you wish to participate in one of our club workshops please contact us through this form. We limit workshops to eight active participants. The participant fee is \$60 each. The club provides aluminum wire. Soil, tools and other materials are up to the participants.

We also welcome observers. You can learn a lot just watching work on other people's material. There is no charge for observers but we always welcome donations. Be aware that space is limited.

We will try our best to respond to your requests within 48 hours.
